

# TESLA INVEST CLUB

International Platform for  
Partnerships and Investment

**2026**

**An Investment Ecosystem Where Countries, Projects, and Capital Meet**

Presentations of  
Regional Investment  
Assets

Strategic Partner Search

Formation of a  
sustainable deal flow

TESLA INVEST CLUB is an international investment ecosystem established by the International TESLA Alliance to facilitate and develop investment attraction into technological projects of enterprises and organizations from BRICS+ countries, ASEAN, MENA, and Eastern Europe.

## GENERAL INFORMATION

TESLA INVESTMENT DAYS brings together investors, entrepreneurs, experts, ambassadors, public authorities, and partners into a single integrated platform.

Once a month, TESLA INVESTMENT DAYS is held in one of the countries participating in the platform.

It is a two-day international investment event where regions from different countries present the investment potential of their territories, projects showcase their opportunities, and investors express interest and conduct negotiations within a transparent and well-structured environment.

Each TESLA Investment Day is a structured event preceded by a two-month preparation cycle.

**TESLA INVEST CLUB** establishes an investment architecture in which projects undergo screening, receive expert recommendations, and are presented to international investors and partners in a well-prepared and investment-ready format. Investors, in turn, gain access to a curated portfolio of projects, territorial analytics, and the TESLA Project Bank.

**Ambassadors and Patrons play a key role** by building trust, facilitating access to local ecosystems, and strengthening the international positioning and credibility of the Platform.
